WESTMINSTER NURSERY

J. E. STONER, Proprietor

WESTMINSTER, MARYLAND

Planter's Special Price List---For Spring of 1923

To our mail order trade:

We have a few facts to tell you, backed up by our millions of choice healthy, vigorous, well grown and graded Peach, Apple, Pear, Cherry and Plum trees, also Berry plants, California Privets, Barbery Thunbergi, and Asparagus plants, etc.
Our stock has made a fine growth. You can't get better anywhere at any

price.

The best is the cheapest, is the verdict of old, experienced orchardists—profit by facts established by others. We ship direct. We are the lowest priced Nursery on earth for sterling quality. We attach Entomologists certificates to all shipments.

Nothing you can grow will give you the permanent income that comes from an

orchard.

Place your orders now. Make sure of your trees. Name kinds, grade and

number wanted. We will reserve the trees until you want them shipped.

Special Discount—We will allow a special discount of 5 per cent on all cash orders received on or before Oct. 1st; after that date 3 per cent discount for Fall shipment. 5 per cent discount before March 1st; after that date 3 per cent discount for Spring shipment.

Boxing and Packing Free-We box and pack all orders without charge. All orders are put up in boxes or bales which are lined with heavy paper to guard against stock drying out. The trees and plants are packed in moist excelsior and straw. This is expensive, but good packing pays—pays customers, pays us. We

guarantee the arrival of stock in good condition.

Freight and Express Rates Do not be influenced by the story of the agent who says that the freight or express on your order will bring our price up as high as his. If you will consult your railroad agent you will find that the freight rates from Westminster to points east of the Mississippi range from 20 to 40 cents per 100 pounds. First class trees will average about one pound each. Therefore, at the highest rate, 40 cents for 100 pounds, it means that you pay less than one-half cent per tree for freight. Nursery stock is carried by all express companies at a discount of 20 per cent less than merchandise rates.

Misrepresentation of the cost of getting stock from us by freight or express is sometimes made by others. Remember, if you bought your stock delivered, or freight prepaid, the freight would be included in the purchase price. The cash discounts which we allow will, in many cases, more than cover your freight or

express charges.

Grading—We guarantee every tree to be up to the grade specified, or better. Many times trees are sold by height only. This, we believe, to be very misleading as we have seen trees which belonged to the second or third grade (if graded by size and calibre) sold for first grade, as they had the required height. We grade and sell our trees both by height and calibre, and believe this to be the only way that gives entire satisfaction to the planter.

Location—Westminster is located twenty eight miles northwest of Baltimore,

on the main line of the Western Maryland R. R., running from Baltimore to Pitts-

burgh, which gives us good shipping facilities.

Our Soil is a deep limestone and rolling, and our nursery grounds lay high, which is just the kind to grow plenty of fibrous roots and form a good stem that will support a tree when it is transplanted into the soil.

SHIPMENTS BY PARCEL POST cannot be larger than 72 inches including the length and circumference of the package. Weight must not exceed 50 pounds within the First and Second Zones—that is within a radius of 150 miles of the shipping point; elsewhere, not more than 20 pounds can be sent by Parcel Post.

Parcel Post. Trees not larger in size than 2 to 3 feet can be sent by parcel

post prepaid, at 3 cts. per tree extra.

PRICES NAMED IN THIS PRICE LIST SUPERCEDE ALL FORMER QUO-TATIONS AND EFFECTIVE FEBRUARY 20, 1923

Special Prices on Large Orders. Special quotations on large orders will be given on application. When writing, tell us what varieties are wanted, the approximate number of trees of each variety, and the size.

Can't you arrange to visit our nursery and see how we grow our Stock?

NOTE:—1 to 4 Trees or Plants of a kind are sold at "Each" rates; 5 to 49 are sold at the "10" rates; 50 to 299 are sold at the "100" rate; 300 to 599 are sold at the "500" rate; 600 or more at the "1000" rate.

All stock nicely packed F. O. B. cars here, in good boxes or bales at prices named in price list.

TERMS:—Orders from parties without rating, billed cash before shipment or one-quarter cash with order, balance when stock is shipped. If all cash with order you get the discount. No discount unless all cash with order. This price list is our salesman, and opens the way for every planter to secure our sterling quality trees at the lowest possible prices.

Nice trees. A large stock of Elbe ta.

I wish to call your special attention to the fact that every one of our large stock of peach trees are budded or Kansas and North Carolina Natural seedlings, the most hardy in the U.S. You cannot afford to overlook this important feature. Our trees are well grown, smooth and well rooted. Our prices are low, considering the quality. Let us have your order at once that we may reserve the varieties for you. Notice about time of Ripening for Westminster, Md.

See catalogue as to different kinds and descriptions of sam	e.	

We sell only trees we grow. This is for your protection as well as our own. Our trees always prove to be just what they are sold for.

NUMBER OF TREES TO AN ACRE

30 feet apart each way	50	10 feet apart each way 345
25 feet apart each way	75	8 feet apart each way 684
20 feet apart each way	110	6 feet apart each way 1,210
18 feet apart each way	135	5 feet apart each way 1,742
15 feet apart each way	205	4 feet apart each way 2,723
11 feet apart each way	300	3 feet apart each way 4,840

RULE—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which divided into the number of feet in an acre, 43,560, will give the number of trees in an acre.

DISTANCE FOR PLANTING

E FOR PLANTING	G -
	30 feet each way
Cherries	20 feet each way
Nectarines	14 to 18 feet each way
	10 to 12 feet each way
rows 8 to 10 feet	apart, 7 to 8 feet in rows
	1 by 4 feet apart
	1 to 2 feet apart
rows 4 to 6 fe	et apart, 2 to 3 feet in rows
	Cherries Nectarines rows 8 to 10 feet

SPRAYERS AND SPRAYING SOLUTION

We sell Sprayers and instruct kind of spraying and teach how and when to spray. We offer Lime Sulphur Solution, Arsenate of Lead, Soluble Oil, etc., at low prices.

SPRAYING CALENDAR

For information about insects, pests and plant diseases, write to the Experiment Station in your state.

Oyster Shell Bark Louse—Attacks apple mainly; use sulphur-lime spray when the leaves are off the trees. If this spraying is ineffectively done, apply kerosene emalsion or whale oil soap when eggs hatch.

San Jose Scale—Attacks nearly all deciduous trees; use sulphur-lime for spray in the spring before the buds burst.

Red Spider—Attacks fruit trees and bushes; spray with sulphur-lime in the spring before the buds burst. This will kill the winter eggs. If the mite appears in summer, use kerosene emulsion, best adding one ounce of sulphur to the kerosene for each gallon of spray, or use sulphur-lime 1½.

Green Aphis—Attacks pear peach, plum, prune trees, etc.; spray with sulphurlime in the spring before the buds burst. If the insects appear, spray with to-bacco into the curling leaves.

Woolly Aphis—Attacks apple trees; use sulphur-lime, kerosene emulsion or tobacco for spraying, just before the buds burst. Spray with force. For summer t eatment use kerosene or tobacco.

Slug—Attacks pear and apple trees; use arsenate of lead for spray when in sects appear, or dust with lime, road dust or ashes.

Scab—Attacks apple and pear trees; spray with sulphur-lime $1\frac{1}{2}$ just before the blossoms open and again while the last blossoms are falling.

BORDEAUX

Bluestone	 pounds
Good lime	 pounds
Water	 gallons

Dissolve the bluestone by suspending it in a sack in 25 gallons of water in a barrel. Slake the lime in another vessel, adding a little water slowly, and dilute to 25 gallons. Mix the two thoroughly. Even the best Bordeaux may scorch in rainy weather For double strength Bordeaux use twice as much bluestone and lime

WHALE OIL AND QUASSIA

Quassia chips	 8 pounds
Whale oil soap	 7 pounds

Soak chips twelve hours in eight gallons of water. Dissolve the soap in boiling water. Strain the quassia extract to remove the chips and add the soap solution. Stir thoroughly and dilute to make 100 gallons. This solution is used almost exclusively for the hop aphis. It is almost as effective without the quassia against other species of aphis. Soap powder or laundry soap may be used in the same proportion without the quassia for most aphides.

SULPHUR-LIME

Sulphur1 pou	$^{\rm nd}$
Good lime½ to 1 pou	$^{\mathrm{nd}}$
Water 5 gallo	ns

First slake the lime in the cooking vat. When slaked add the sulphur and about one-fifth of the water, so that the mixture will boil easily. Keep it well stirred. Boil until the sulphur is completely dissolved, which should take less than one hour. Then add the rest of the water and the mixture is ready to spray. Use only the clear liquid. It should be poured into the spraying tank through a strainer. It may be used hot or cold. There are several ready-made sulphur-lime washes which give good results when properly diluted. When mixed 1 part to 10 parts of water they usually correspond in strength to the formula above.

ARSENATE OF LEAD

Arsenate	of	lead	 	 	1 pound
Water			 	 	50 gallons

It is unnecessary to use it stronger. It is more reliable than Paris Green. It is especially useful where there is much rain. It sticks well and does not scorch. Mix well first with a small amount of water.

KEROSENE EMULSION

Kerosene	2	gallons
Whale oil soap	1/2	pound
Water	. 1	gallon

Dissolve the soap in the water by boiling and add the suds boiling hot to the kerosene, away from the fire. The mixture is then to be agitated violently, preferably by pumping it back into itself with a force pump. After four or five minutes the mixture suddenly becomes creamy in consistence. If well made the cream will stand for a long time without free oil rising to the surface. Use one gallon of the emulsion to 12 gallons of water in spraying. One quart of soft soap or one pound of laundry soap may be used instead of the whale oil soap.

If Frozen when Received bury the package unopened in well drained ground or place it in a cool cellar, so that it will thaw out slowly and gradually without being exposed to the air.

If they should appear Dry or Shriveled When Received, through delay in transit, or from any cause, take them from the package and plunge into a tub of water or bury the roots in the ground in an inclined position, so as to cover one-half or more of the tops with earth, and then thoroughly soak with water, and then let remain for twenty-four hours or more, until they regain their fresh, plump appearance, when they may be planted.

Our Guarantee—While we exercise the greatest care to have every tree and plant true to name and are ready, on proper proof, to replace anything sent by us that proves untrue to label, free of charge, it is understood and agreed between purchaser and ourselves that we are not to be held liable for any greater sum than that paid us for said trees that may prove untrue.

Time of Shipment—To the Fall trade, we will commence to ship trees as soon as the leaves are off and the wood ripe, and plants about the 1st of October and continue as long as the weather is mild. For the Spring trade, in most seasons, we can fill orders as early as February for the South, as late as May for the Northern customers. Always name date when you want stock shipped, but have it reach you before you need it. We endeavor to handle your stock in the best manner, pack it up nicely and give you good count.

When Best to Order-Order now, do not wait until you are ready to plant. Your order will not be shipped until the proper time.

How Best to Remit—Remit by Bank Draft, Express Money Order, or Post Office Money Order on Westminster Post Office, Registered Letter, or stamps for the fractional part of a dollar. Payments invariably in advance.

Prices named in this list supercede all former quotations and are subject to change without notice,

Claims for Deduction should be made within five days from receipt of goods.

This special price list is our agent and the kinds and varieties of stock named herein are comprised largely of the stock we grow.

Advantages of Fall Delivery of Nursery Stock

What a Leading Horticultural Journal Says:

In our own experience the best success has resulted in transplanting trees and shrubs in the Fall, in properly prepared soil, and giving Winter protection by mulching with litter of leaves. Such subjects usually start to grow promptly in Spring, and have already made a fine growth before Spring-planted trees have started. We do not hesitate to advise Fall planting in climates not more severe than our own.—Vick's Magazine.

Some of the reasons why experienced planters like to buy for Fall delivery

are as follows:

1st.—All kinds of stock, except Evergreens and Peaches, in cold sections do well when planted in the Fall.

2d.—The ground is in much better condition in the Fall, being mellow and

warm.

3d.—Before Spring, stock which has been planted in the Fall gets well established in its new position and so gets an early start, and makes a large growth the first scason, while stock planted in the Spring loses considerable valuable time in getting established in its new quarters.

4th.—Stock is completely dormant in the fall, and therefore can be easily and safely handled, while in the Spring the weather often comes off warm so early as to start the buds seriously before the customer can receive and plant his stock.

5th.—Stock planted in the Fall gets the benefit of the late Fall and early Spring rains, which is of vital importance; on the contrary, stock set in the Spring frequently has to worry through a dry Summer, which it is utterly unprepared to do after having been so newly transplanted. The result is that its growth is stunted.

6th.—Fruit is produced the first Summer when Grape Vines, Currants, Rasp-

berries, Blackberries, Gooseberries, etc., are planted in the Fall.

7th.—Rose Bushes and Shrubs set out in the Fall bloom profusely the first Summer.

8th.—Farmers and others have more time to attend to stock in the Fall, and can therefore give it better care, which is very important. Much stock is lost by farmers when planted in the Spring because their farm work presses so then that the stock is neglected.

9th.—Stock delivered in the Fall arrives in better order, because Nurserymen have more time in which to handle it; but in the Spring it comes off warm so suddenly that it is time to plant before the stock can possibly be dug, packed and delivered to all the thought of automorphic packets and the contractions.

delivered to all the thousands of customers scattered over the country.

10th.—The railroads are crowded and overworked in the Spring so that it is impossible to get stock through as rapidly as in the Fall, and the result is more or less serious delay.

11th.—Many extensive and experienced planters, like the late horticultural writer, E. P. Roe, always prefer to plant in the Fall. (See extract at top of this

circular from Vick's Magazine.)

12th.—Even if the customer is not able to plant until Spring, or the climate is too cold, it is wise to have the stock delivered in the Fall, so that he can trench it in carefully, and seize the earliest moment in the Spring to set it out, instead of losing valuable time in the Spring waiting for the overworked nurserymen and railroads to get the stock around.

HOW TO "HEEL IN" OVER WINTER

There is a popular impression that trees dug in the Fall and heeled in over winter are worthless. If the heeling is well done it is perfectly safe. Peach and some other young trees, if left standing during their first Winter, are frequently killed or injured by frost, while if dug in the Fall and treated as below described,

they come through bright and uninjured.

To insure success select a dry spot where no water will stand during Winter, having no grass near to invite mice. Dig a trench deep enough to admit one layer of roots, and sloping enough to permit the trees to lie at an angle of not more than 30 degrees with the ground. Having placed one layer of roots in this trench, cover them with mellow earth extending well up on the bodies, and see that this is firmly packed. Then add another layer of trees, over-lapping the first, continuing as at first until all are heeled in. As soon as this is done, cover the tops so well with evergreen boughs that they will be thoroughly protected from winds. Roses and other small stock may be wholly covered with earth.

NOW IS THE PROPER TIME TO PLANT AN ORCHARD WHY?

Because there are less Peach and Apple trees in the United States to-day than there were in 1910.

The following figures were copied from a bulletin issued by the Department of Commerce, Bureau of The Census, Washington, D. C. dated June 27, 1921.

APP	LES	:

Trees of bearing age—	
1920	.115.265.029
1910	
Decrease	
Per cent of decrease	. 23.8
Trees not of bearing age—	
1920	. 36,171,604
1910	
Decrease.	. 29,620,244
Per cent of decrease	

PEACHES:

Trees of bearing age—	
1920	65,654,921
1910	94,506,657
Decrease	28,851,736
Per cent of decrease	30.5
Trees not of bearing age—	
1920	21,623,657
1910	42,266,243
Decrease	20,642,586
Per cent of decrease	48.8

Another reason why every fruit grower should increase his planting is that our prices on peach and apple trees have been reduced more than 50 per cent.

On the other hand, prices of fruit this season are high---much above the prewar basis.

The Westminster Nursery, Westminster, Md.

HOW TO ORDER Our Price List is Our Salesman. Fill out this Order Sheet with the items you want to buy, enclosing well known all through the country. You can learn of our responsibility through any commercial agency, bank, banker. For weak and ship in paper lined boxes and bales. Our Regular Spring Shipping Season opens from March First. State positively how we are to ship, whether by Freight, Express or Mail. If by Freight or Express, give name of Railroad Station and your Post Office. All Agreements and Contracts are made subject to loss of Crop by Drought, Floods, Fire, Insects, or other unavoidable causes. All quotations are made subject to stock being sold on receipt of order.
